

WONDERSPACE

within
Museum of Puppets exhibition
16th edition

first year students from
Technical University of Cluj-Napoca, Faculty of Architecture

Art Museum, Cluj
6th - 17th July 2022

The students of the Faculty of Architecture and Urbanism become the protagonists of the location production team of WonderPuck Street Festival, 6th edition, by designing the ambience and scenographic setting adapted to the theme "The Neverending Story" - with references to a fantastic, dreamlike universe.

The exhibition of models and sketches created by first year students documents the first stage of the WonderSpace section of the festival. The project explores the role of the setting, which is more than an aesthetic act, it becomes mise-en-scène and creates the festival's atmosphere. The students' work can be defined as installation-objects, set design or scenography.

Through the Form Studies course, the students explore the definition of scenography and its adjacent variations. WonderPuck 2022 Street Festival becomes the catalyst of this exploration in the public space of Cluj. The project will be materialized through the design of scenery elements of the 6th edition of WonderPuck Festival, in the 3 main locations: Unirii Square, Cluj Art Museum and Ethnographic Museum of Transylvania - Reduta Palace, during 9-11 September 2022.
